

CODEC

The first two steps are the most important. The first step is to identify the problem. The second step is to define the problem. The third step is to identify the causes of the problem. The fourth step is to identify the effects of the problem. The fifth step is to identify the stakeholders involved in the problem. The sixth step is to identify the resources available to solve the problem. The seventh step is to identify the constraints on the problem. The eighth step is to identify the risks associated with the problem. The ninth step is to identify the opportunities associated with the problem. The tenth step is to identify the solutions to the problem.

CPU

The diagram shows a 2D hexagonal lattice. A central hexagon is labeled 'A'. The lattice is bounded by a thick black line on the right side. Some hexagons are shaded in gray.
